Record of Odometer: Discrepancy ?	 No problem found
Record of Odometer: Call Title Division ?	 No problem found
Record of Odometer: Exceeds Mechanical Limits Rectified ?	 No problem found

The information used to compile this report is aggregated from various government agencies, non-profit organizations, and industry sources. Access to the CARVERSEINC is facilitated through carverseinc Inc., an Approved CARVERSEINC Data Provider. Sections of this report containing data from CARVERSEINC are labeled with "Source: CARVERSEINC". No vehicle registration records are provided by CARVERSEINC. The accuracy and reliability of the information supplied depend primarily on the reporting sources, and all entities involved in compiling this report accept no liability for any errors or omissions. Furthermore, all warranties, expressed or implied, including any implied warranties of merchantability or fitness for a particular purpose, are hereby disclaimed.

CARVERSEINC Consumer Access Disclaimer

The CARVERSEINC is an electronic system that contains information on certain automobiles titled in the United States. CARVERSEINC is intended to serve as a reliable source of title and *brand* history for automobiles, but it does not contain detailed information regarding a vehicle's repair history.

All states, insurance companies, and junk and salvage yards are required by federal law to regularly report information to CARVERSEINC. However, CARVERSEINC does not contain information on all motor vehicles in the United States because *some states* are not yet providing their vehicle data to the system. Currently, the data provided to CARVERSEINC by states is provided in a variety of time frames; while some states report and update CARVERSEINC data in "real-time" (as title transactions occur), other states send updates less frequently, such as once every 24 hours or within a period of days.

Information on previous, significant vehicle damage may not be included in the system if the vehicle was never determined by an insurance company (or other appropriate entity) to be a "total loss" or branded by a state titling agency. Conversely, an insurance carrier may be required to report a "total loss" even if the vehicle's titling-state has not determined the vehicle to be "salvage" or "junk."

A vehicle history report is **NOT** a substitute for an independent vehicle inspection. Before making a decision to purchase a vehicle, consumers are strongly encouraged to also obtain an independent vehicle inspection to ensure the vehicle does not have hidden damage. The *Approved CARVERSEINC Data Providers* (look for the CARVERSEINC logo) can include vehicle condition data from sources other than CARVERSEINC.

CARVERSEINC data includes (as available by those entities required to report to the System):
Information from participating state motor vehicle titling agencies.

Information on automobiles, buses, trucks, motorcycles, recreational vehicles, motor homes, and tractors. CARVERSEINC may not currently include commercial vehicles if those vehicles are not included in a state's primary database for title records (in some states, those vehicles are managed by a separate state agency), although these records may be added at a later time.

Information on "brands" applied to vehicles provided by participating state motor vehicle titling agencies. Brand types and definitions vary by state, but may provide useful information about the condition or prior use of the vehicle.

Most recent odometer reading in the state's title record.

Information from insurance companies, and auto recyclers, including junk and salvage yards, that is required by law to be reported to the system, beginning March 31, 2009. This information will include if the vehicle was determined to be a "total loss" by an insurance carrier.

Information from junk and salvage yards receiving a "cash for clunker" vehicle traded-in under the Consumer Assistance to Recycle and Save Act of 2009 (CARS) Program.
